## **AMENDMENT TO THE CLAIMS:**

This listing of claims will replace all prior versions of claims in the application:

Claims 1 - 10. (Canceled)

- 11. (New) A paper roll for operation in conjunction with a dispensing system, comprising braking means internal of said roll arranged to brake unwinding of said roll.
- 12. (New) The roll as claimed in claim 1, wherein said braking means comprises at least one layer of adhesive material deposited on at least one side of the roll.
- 13. (New) The roll as claimed in claim 2, wherein said at least one layer covers at least 15% of a surface of said at least one side.
- 14. (New) The roll as claimed in claim 2, wherein said at least one layer is deposited by printing.
- 15. (New) The roll as claimed in claim 3, wherein said at least one layer is deposited by pad printing.
- 16. (New) The roll as claimed in claim 2, 3 or 4, wherein the at least one layer of adhesive material is deposited according to a regular pattern of points.
- 17. (New) The roll as claimed in claim 2, 3 or 4, wherein the at least one layer of adhesive

material is deposited according to a continuous pattern.

- 18. (New) The roll as claimed in claim 2, 3 or 4, wherein the at least one layer of adhesive
- material is deposited according to a pattern comprising point zones and continuous zones.
- 19. (New) A manufacturing process for a paper roll comprising forming the roll, applying at

least one layer of adhesive material to at least one side of said roll in such a way that said at least

one layer partially penetrates interiorly of a winding of the roll.

20. (New) The process as claimed in claim 9, further comprising depositing said at least one

layer by printing.

21. (New) The process as claimed in claim 9 or 10, wherein the adhesive material is an

aqueous compound.
